# Mohamed Naser

Technical Lead | Fintech & Scalable Systems | PHP, Laravel, React | 10+  
Cairo, Egypt

## Summary

Technical Lead with 10+ years of progressive experience in web development, currently driving innovation in the fintech sector. Passionate about building scalable solutions and leading high-performing development teams to deliver exceptional products.

My journey spans multiple industries including finance, e-commerce, communication, and government sectors, where I've consistently transformed complex requirements into elegant technical solutions. From developing network signal analysis systems and government archiving platforms to leading fintech initiatives, I bring both technical depth and leadership experience to every project.

As a technical lead, I excel at architecture design, team mentorship, and bridging the gap between business objectives and technical implementation. My full-stack expertise allows me to guide cross-functional teams while maintaining hands-on involvement in critical development phases.

## Technical Expertise

- Languages: PHP, Ruby, JavaScript (ES6), TypeScript, HTML5, CSS3
- Frameworks & Libraries: Laravel, Ruby on Rails, ReactJS, Node.js, Express, Yii2, Zend, JQuery, Bootstrap, SASS
- Databases: MySQL, PostgreSQL, MongoDB, SQLite, ActiveRecord
- DevOps & Tools: Git, Docker, AWS, CI/CD pipelines, Jira, Agile methodologies
- Concepts: Microservices Architecture, Test-Driven Development (TDD), Object-Oriented Design, RESTful APIs, GraphQL, Distributed Systems

## Career Highlights

- Leading fintech development teams to deliver secure, compliant payment processing solutions

- Architected and implemented "Tazhub," a unified public transportation ticketing platform
- Developed financial reporting system for Johnson & Johnson and notification systems for TOTAL
- Created an automated documentation archiving system for the Egyptian government
- Built network signal quality tracking and analysis platform generating comprehensive coverage reports

## Experience

لينك | Lynk

Technical Lead

March 2024 - Present (2 years 3 months)

Riyadh, Saudi Arabia

Leading architecture and engineering for an Islamic fintech platform specializing in Murabaha commodity trading, enabling Sharia-compliant financing for institutional and retail clients.

Architected multi-database system separating business logic from financial ledger for auditability and compliance

Designed order progression engine driven by queued jobs, supporting multiple commodity exchange integrations (DMCC, Bursa Malaysia, local market )

Implemented ZATCA e-invoice integration for Saudi tax compliance

Built multi-tenant request isolation layer using Laravel

Established action-based architecture pattern for clean separation of business logic

Carefer

4 years 5 months

Technical Team Lead

January 2022 - March 2024 (2 years 3 months)

Saudi Arabia

Led technical transformation of comprehensive car maintenance automation platform, orchestrating end-to-end automotive service workflows from vehicle pickup to customer delivery across multiple stakeholder applications.

Achievements:

- Platform Architecture: Designed and implemented comprehensive car maintenance automation system processing 50K+ monthly service orders
- Complex Workflow Management: Built sophisticated order status chain system supporting 7+ order types with dynamic action triggers and automated notifications.
- Multi-Application Ecosystem: Successfully delivered 5 specialized applications (Admin Dashboard, Customer App, Workshop application, Driver Mobile App, Companies Portal) with seamless data synchronization.
- Third-Party Integration Excellence: Integrated 15+ external APIs including parts suppliers, license verification systems, and driver management platforms, reducing manual coordination by 90%.
- Team Scaling Success: Grew engineering team from 3 to +20 (600%) while maintaining code quality and delivery timelines.
- Process Innovation: Automated entire maintenance workflow from pickup scheduling to delivery confirmation, reducing average service time by 60%

Senior Back-End Developer |PHP, Laravel, Zend|  
November 2019 - January 2022 (2 years 3 months)  
Saudi Arabia

Responsibilities:

- \* Develop and manage new APIs.
- \* Maintain existing dashboards and APIs.

- \* Collaborate with the mobile team to develop and deliver new features.
- \* Integrate with third-party systems, such as Odoo ERP, based on business needs.
- \* Develop monitoring tools for system health and performance.
