## SUMMARY

Motivated Back-End Developer with 3+ years experience in php web development seeks employment as part of a dynamic software development team.

I have bachelor's degree in computer engineering/science with ability to code programming, debugging, and implementation. Responsible for managing back-end services and the interchange of data between the server and the users . having a Strong knowledge and experience in PHP application development as well as familiarity with LAMP stack, HTML, CSS, and JavaScript.

My primary focus is development of all server-side logic,definition and maintenance of the central database by open source stack (Linux/Apache/MySQL/PHP) , and ensuring high performance and responsiveness to requests from the front-end.

I have interesting in writing technical documents for projects like (SRS, use cases, time estimation, ... ) .

<< Programming Language >>

- Php
